

Fall 2026 - ECCB 689 Special Topics in ... Modeling Ecological Niches and Species' Distributions

Dr. Michelle Lawing | Tues/Thurs 2:50–4:05 | WFES 411

What is this course?

A project-centered, coding-based course using real data to build, evaluate, and interpret ecological niche models in R.

Why take this course?

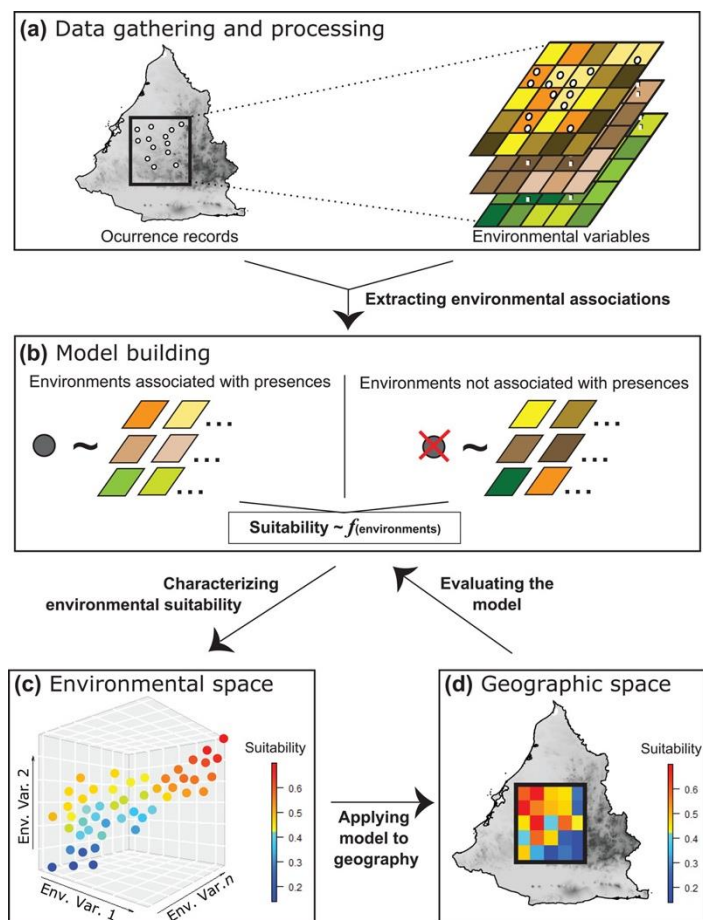

Gain practical modeling skills, produce a complete research workflow, and critically evaluate ecological models.

Structure

- Weekly coding assignments (40%)
- Term project (60%)
- No exams
- Reproducible workflows

What will you do?

- Work with real data
- Build niche models
- Evaluate predictions
- Develop an independent project
